

## Presentation by John King, PhD

### URI Graduate School of Oceanography

Wednesday October 25, 2023

6:30 to 7:30 p.m.

BSFD Community Center

Dr. King will give a presentation on the FEMA funded survey that is being conducted in the waters off Little Beach. He will cover what is being done and why; any data collected to date; and what BSFD could potentially use the final data for when the project is completed.

Dr. King plans on having the final report completed in about 10 months. The final report will provide data that could be used to develop strategies for protecting the shoreline at Little Beach. This will involve applying for future grant. Dr. King is not responsible for implementing any future plans or resolving any current issues, but he will likely provide guidance.
